

EVOS SB7

The smartest way to charge your EV

The EVOS SB7 enhances your EV charging experience at the home, making it easier, smarter, and more efficient.

EVOS designs and manufactures its EV charging products in Australia to deliver quality, performance and innovation.

EV Charger Specification

Charging power	7.36kW at 230V
Connector type	Type 2 or 1
Maximum Input Current	32 amps
Nominal AC Frequency	50 Hz / 60 Hz
Input voltage	110 / 230V AC ± 10% (1P)
Operating temperature	From -25°C to +55°C
Relative humidity	0-95%
Ingress Protection	IP65
Cable length	Up to 5m (Standard). Other lengths optional.
Impact Protection	IKO8
Dimensions (DxW)	320x90mm
Weight (including cable):	3.5kg
Wireless Communication	Wi-Fi
Communication Protocol	OCPP 1.6j
Storage Temperature	From -40°C to 85°C
Packing Weight	3.85kg
Packing Dimensions (LxDxW)	385x385x100mm
Units per pallet	99
Protection	Built-in 6mA DC RCD. Only type A RCD + MCB required
User interface	LED
Certification	CE Certified, CB Certification
Standards	IEC 61851-1, IEC 61851-21-2
	EU RoHS Directive Compliant
